“Nerve Transfers: A 19th Century Idea Revolutionizes 21st Century Care of Nerve Injury”

In the last decade, nerve transfers have revolutionized the care of nerve-injured patients. Mackinnon discusses the story behind the "re-introduction" of this 19th Century technique into modern nerve surgery.

Susan E. Mackinnon, M.D.
Professor of Plastic and Reconstructive Surgery
Washington University School of Medicine

Thursday, December 4, 2014

4:30 p.m.

Becker Medical Library, 7th floor
King Center
