43rd *Historia Medica*

Stanley Misler, MD, PhD
Departments of Internal Medicine;
Cell Biology/Physiology; and
Biomedical Engineering
Washington University School of Medicine

“The Isolated Pancreatic Islet as a Micro-Organ and its Transplantation to Cure Diabetes: Celebrating the Legacy of Paul Lacy”

Dr. Misler has spent over 30 years at Washington University School of Medicine as a researcher, clinician and teacher. For 25 years, he worked on pancreatic beta cells, especially from human tissue provided by the Lacy-Scharp lab.

Paul Lacy, MD, PhD

Thursday, February 19, 2015

4:30 p.m.

**Becker Medical Library, 7th floor
King Center**

Free and open to the public – reception to follow
